## General Information

Burgas Region provides 5.22 % of the GDP of the country under following transport and market infrastructure:

- Port of Burgas, Oil Harbour and Fish Port, Ports of Sozopol, Nessebar and Tsarevo;
- Burgas Airport, incl. Cargo Terminal;
- Enlarged Railway Stations in Burgas and Karnobat;
- Large-scale motor transport companies in Burgas and Karnobat;
- Large warehouse areas – open-air and in premises – located mainly in the Port area and near to the Highway Burgas – Karnobat;
- Burgas Free Zone.

## Industry

Industry with its multi-branchy specificity is a leading sector in the economic structure of Burgas. Included are most branches excepting vehicle construction, low- and high-voltage installations and partially electronics. Some of the productions are unique or determinant for the country as for example: dark and light oil-products, chemical fibres, plastics and other chemistry products; shipbuilding, airconditioning and waste-treatment plants, goods waggon-building, fish-processing industry etc.

Following industrial branches are of determinant structural importance:

- Petrochemical/oilrefining industry – provides 70 % of the industrial production scope;
- Food industry and wine production – 12,2 %;
- Electric and heating power production – 3,6 %;
- Textile industry – 2,4 %

Burgas Region is highly industrialized. Tourism, agriculture and transport complement the image of the Region.
